Serial No. 09/734,156

Art Unit 1713

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4-7 are rejected under 35 U.S.C. § 102(b) as being anticipated by Daughenbaugh et al., U.S. Patent 5,502,140.

Claims are rejected for reasons of record. Applicants have amended the claims to further restrict the percentage of vinyl aromatic monomers in the resin composition and to lower the required Mz of the products. The second requirement is only reflected in one o the dependent claims. The percent requirement for the vinyl aromatic component of the polymers is to less than about 50%. Reference to Daughenbaugh et al. specifically teaches a range for the vinyl aromatic monomers in their copolymers of 60% to 10%. Clearly the range going down to 10% teaches amounts below 15%. Although the examples only go down to 15% itself, it is clear that the reference teaches going below this amount to produce usable resins. The specific range of softening point required in the dependent claims as well as the Mz requirement are specifically taught in the reference and exemplified therein.

Serial No. 09/734,156
Art Unit 1713

The Example that goes down to an Mz of less than 1200 is Example 9, Sample 1. This is with a content of 15% alphamethylstyrene. It is clear from the teaching from the reference that the resins specifically taught include those that go down below 15% vinyl aromatic content and meet the physical requirements of applicants' claims. The claims are, therefore, anticipated by the reference. Applicants' argument that the reference does not teach polymers made by the process taught by the applicants is not relevant insofar as the claims do not require products made by this process, nor is there any physical characteristic listed in the claims which is not met by the teaching of the reference. The reference to Daughenbaugh et al., therefore, anticipates applicants' claims.

2. THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED

Serial No. 09/734,156
Art Unit 1713

STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

3. This application contains claims 2, 3 and 7-10 drawn to an invention non-elected with traverse in Paper No. 8, filed December 16, 2002. A complete response to the final rejection must include cancellation of non-elected claims or other appropriate action (37 CFR 1.144) MPEP § 821.01.
